Aims of punishment; treatment of criminals; capital punishment

Compare

Describe

Identify

YEAR 10

Through this course, students will use and develop their substantive knowledge (learning about a variety of religious and non-religious traditions) alongside their personal knowledge, reflecting on their own ideas and values to create reasoned, evidence informed responses.

## Core Aim:

In Year 11, students will explore a range of ethical questions and theological evidence to consider issues which impact our society. By exploring these contemporary topics, students will be better equipped to contribute effectively and inclusively as global citizens.
